

# SARA-N3 series

## Multi-band NB-IoT modules

### Globally configurable NB-IoT modules ready for 3GPP Rel 14 and 5G

- Broad feature set enabling new IoT applications
- Ultra-low power consumption delivering 10+ years battery life
- Critical firmware updates delivered via uFOTA with LwM2M
- Easy migration between u-blox LTE-M and 2G modules
- Professional grade manufacturing (ISO/TS16949); qualified according to ISO 16750

### Product description

SARA-N3 NB-IoT multi-band modules support a selected set of features based on 3GPP Release 14. The products will be able to receive additional features and ultimately become Release 14 and 5G compliant via subsequent firmware upgrades.

SARA-N3 modules introduce several new firmware features and internet protocols for NB-IoT products, including TCP, CoAP, DTLS, LwM2M, MQTT, SSL/TLS and HTTP(S). They enable a diverse and broad set of new IoT applications and simplify customer migration to NB-IoT from other legacy cellular or unlicensed technologies. With u-blox nested design, easy migration between u-blox LTE-M, LTE Cat 1 and 2G modules is guaranteed, while enabling future-proof, seamless mechanical scalability across technologies.

SARA-N3 is a power optimized product that delivers 10+ years of battery life on a single cell primary battery, thus reducing maintenance costs. Critical firmware updates can be delivered over the air using the u-blox uFOTA client / server solution with LwM2M, which is a more lightweight solution compared to OMA-DM. LwM2M dynamically configurable objects allow device makers to develop customized features.

The SARA-N3 series is manufactured to professional grade standards with 100% automatic x-ray and optical inspection on modules, as well as 100% outgoing test, product traceability, PCN process, failure analysis and product qualification according to ISO 16750. This level of quality is paramount for highly reliable products intended for long term use in the field.

## Package

96 pin LGA: 16.0 x 26.0 x 2.4 mm, < 3 g

## Environmental data, quality & reliability

Operating temperature	-40 °C to +85 °C
RoHS compliant (lead-free)	
Qualification according to ISO 16750	
Manufactured in ISO/TS 16949 certified production sites	

## Electrical data

Power supply	3.6 V nominal, range 2.6 V to 4.2 V
Power consumption	PSM deep-sleep mode: 3 µA eDRX idle mode: < 1 mA Rx mode: 23 mA Tx mode at maximum power: 250 mA

## Certifications and approvals

SARA-N300	CCC, SRRC, CMCC <sup>2</sup> , CTCC <sup>2</sup> , CUCC <sup>2</sup>
SARA-N310	RED, RCM, ATEX/IECEX, GCF, NCC, IMDA, NBTC, Vodafone, Deutsche Telekom
